

BEING

Space for experiencing the new time

A weekend exploring of how the "I, community and the whole" are acting together in a way which resonates with the new earth.

At first: there is no workshop-teacher in the sense of "teacher and pupils". There is the invitation, the dedication to the new and the selfresponsibility of each one for the emerging of the "We-space". This is one foundation of the new time. Furthermore, freedom of each one to follow his/her own inner impulses- in respect of the others.

The earth is our connection. We do not meet in an total empty space to see what will happen. We are connected by sharing a place, a part of the living, conscious earth. Within that dedications experience will open up, which correspond to the quality of "heaven on earth". The presence of a spirit, in which all human beings become brothers and sisters, as the fundamental quality of all what is done and to fullfill a cosmic consciousness through the authenticity of each one ("I"), the community ("We") and the whole ("world")

There is no program, a few exercises can be helpful to attune to the place. It is the willingness to even face a crisis. The crisis of "not knowing". And there is the possibility of a spiritual presence, which can not be done or lead to in a group / seminar. Which only can manifest, when freedom, openness and transparence is provided.
